Important Note for TCP Color Mapping Guide

Dear valued Client,

thank you for your interest in our reengineered classic parts. To chose the right color for the desired part, please consider the following:

- Depending on the material (Leather, MB-TEX, Vinyl), Interior colors tend to change with time from their original color
- This is usually caused by Time, Sun or other Elements
- The original color code might differ from the color fits in your car now, and the genuine material!

Therefore, please check the color variations with your actual appearance, to ensure the perfect fit and satisfaction with your purchase. But be aware that every Computer Screens shows Colors different too. So there will be a **small** difference between the color you see here, and the color you get ;o(
